Zondervan. Paperback. Book Condition: new. BRAND NEW, The Case for a Creator: A Journalist Investigates Scientific Evidence That Points Toward God, Lee Strobel, "My road to atheism was paved by science but, ironically, so was my later journey to God."-Lee Strobel During his academic years, Lee Strobel became convinced that God was outmoded, a belief that colored his ensuing career as an award-winning journalist at the Chicago Tribune. Science had made the idea of a Creator irrelevant-or so Strobel thought. But today science is pointing in a different direction. In recent years, a diverse and impressive body of research has increasingly supported the conclusion that the universe was intelligently designed. At the same time, Darwinism has faltered in the face of concrete facts and hard reason. Has science discovered God? At the very least, it's giving faith an immense boost as new findings emerge about the incredible complexity of our universe. Join Strobel as he reexamines the theories that once led him away from God. Through his compelling and highly readable account, you'll encounter the mind-stretching discoveries from cosmology, cellular biology, DNA research, astronomy, physics, and human consciousness that present astonishing evidence in The Case for a Creator.
