RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 74 pages. Original publisher: Reston, Va. : U. S. Geological Survey, 2009. OCLC Number: (OCoLC)468763670 Subject: Fires -- Monitoring -- Oregon -- Vale -- Remote sensing. Excerpt: . . . when combined with cover data, provide a picture of the plant community at a site. Basal-gap intercept measurements quantify the size and amount of large gaps between plant bases, which can be used to track susceptibility to runoff and water erosion. Data for each parameter were first averaged over the three transects to derive a plot estimate. Plot estimates at all treatment and control plots were then averaged together to derive values for the entire monitoring unit. Line-Point Intercept At every meter along each 50-m transect, a pin was lowered to the ground at a 90 angle to the transect line. Each plant and type of soil surface that intercepted the pin was recorded at each point. Plants intercepted at each point were categorized as top canopy, lower canopy, or basal cover. The soil surface was recorded as litter, bare soil, rock, moss, or the base of plant (Herrick and others, 2005a). Several types of cover...

Reviews

Thorough manual for publication fanatics. It is actually rally intriguing throug reading through period of time. Its been written in an remarkably simple way and is particularly only after i finished reading through this book in which actually transformed me, change the way i think.

-- **Morris Schultz**

Unquestionably, this is actually the greatest function by any writer. We have go through and so i am confident that i am going to gonna read through once more once again later on. I am just happy to explain how this is actually the very best book i have got go through during my individual existence and might be he greatest ebook for ever.
