

Starlight Detectives: How Astronomers, Inventors, and Eccentrics Discovered the Modern Universe

Filesize: 9 MB

Reviews

This publication might be worthy of a read through, and superior to other. It normally is not going to charge excessive. Its been written in an remarkably simple way and is particularly just after i finished reading through this book through which in fact transformed me, alter the way i really believe.

Bellevue Literary Press. Paperback. Book Condition: New. Paperback. 400 pages. Dimensions: 8.9in. x 6.0in. x 1.1in. Discover magazine Top 5 Summer Read Scientific American Recommended feature review A masterful balance of science, history and rich narrative. Discover magazine Hirshfeld tells this climactic discovery of the expanding universe with great verve and sweep, as befits a story whose scope, characters and import leave most fiction far behind. Wall Street Journal Starlight Detectives is just the sort of richly veined book I love to read full of scientific history and discoveries, peopled by real heroes and rogues, and told with absolute authority. Alan Hirshfeld's wide, deep knowledge of astronomy arises not only from the most careful scholarship, but also from the years he's spent at the telescope, posing his own questions to the stars. DAVA SOBEL, author of *A More Perfect Heaven: How Copernicus Revolutionized the Cosmos* and *Longitude* In 1929, Edwin Hubble announced the greatest discovery in the history of astronomy since Galileo first turned a telescope to the heavens. The galaxies, previously believed to float serenely in the void, are in fact hurtling apart at an incredible speed: the universe is expanding. This stunning discovery was the culmination of a decades-long arc of scientific and technical advancement. In its shadow lies an untold, yet equally fascinating, backstory whose cast of characters illuminates the gritty, hard-won nature of scientific progress. The path to a broader mode of cosmic observation was blazed by a cadre of nineteenth-century amateur astronomers and inventors, galvanized by the advent of photography, spectral analysis, and innovative technology to create the entirely new field of astrophysics. From William Bond, who turned his home into a functional observatory, to John and Henry Draper, a father and son team who were trailblazers of astrophotography and spectroscopy, to geniuses of invention such as Lon Foucault, and George Hale,...
